"Where Everybody Buys"

## Concerning Registration and Exemption

That it is the desire of the military authorities to obtain the necessary reinforcements by taking such men as can best be spared, without unduly disorganizing the agricultural, industrial, or commercial activities of the country. On the other hand it is pointed out that re-inforcements are most urgently required, and that everyone must expect to make some sacrifice or be put to some inconvenience when the country is engaged in such a momentous struggle. The proclamation calling out the first-class will speedily a delay of probably twenty days, during which all men of the class called out must either report for service or claim exemption. Failure to do so will render the offender liable to five years imprisonment with hard labour, on summary conviction under section 4 of the Act. This reporting or claiming exemption will be carried out as follows:

Forms of report for service and of claim for exemption are being distributed to all the post offices throughout the country. The proclamation directs all men of the class called out to attend at the nearest post office and fill in either one of these forms. Upon doing so each man will be given a counterfoil to show that he has complied with the law.

I have the honour to be your obedient servant,  
D. M. MURRAY,  
Military Representative  
Office at R. M. Henderson's.

## Imperative To Buy Victory Bonds

In this issue appears an advertisement with the heading by the Dominion Government of "Victory" War Bonds. The advertisement should have the serious interest of every man and woman. In order to purchase the wheat and other Canadian products the Dominion MUST have money. There is only one buyer for Canadian products in the Great Britain through the Dominion Govt. This product must be sold largely on credit, but is purchased from the producer for cash. There are millions of dollars in this country lying dormant. This money is now badly needed for the successful progress of the country. In other words Canada is now dependent on herself financially. It is to all our interests that this issue of bonds be a most successful issue. A bond is a great investment, it is as good as money when presented for security at the bank. It will make you money at 5 1/2 per cent interest and is not subject to taxation. By investing in war stock you maintain the price of wheat and the prosperity of your country. Let us all help.

Piano Tuner's regular half yearly call, Oct. 30 and 31. Leave orders for tuning at Express Express office or Dawson's Music Store.

Pullin and Barry

## Attempted Arson

A case of attempted arson was discovered on Saturday morning on the local police barracks. A pile of oil-soaked rags were discovered at the north-west corner of the building. The work was quite badly charred at that corner, and extended upwards nearly to the gables of the building. The attempt was evidently frustrated by the elements as no person reports of either setting or extinguishing the blaze. It apparently was an attempt at retaliation by some lawless individual who has run amok with some violation of the law

at the hands of Constable Vaik. It seems to be a matter of record, in most cases of this nature, no thought is given by such individuals to the serious possibilities of the configuration they are starting, or the possible loss of life of such a tardy work. It is to be hoped that the miscreant will be caught and sentenced to the limit.

## FOR SALE

Young pigs, 2 months old and over - W. J. Crocker, Sec. 18-21-1.  
I have a good six months old calf for sale will make for female butchering. E. J. Lacy.

## Death of Mrs. Judith Hayes

The death of Mrs. Judith Hayes, age 67 years, mother of C. W. Hayes the local agent for the Imperial Lumber Company, occurred at the family home on Thursday of last week. The funeral services were conducted in the theatre building on Saturday afternoon by the Rev. G. G. Pylus. Interment took place in the Empress cemetery. The deceased had been in failing health for some time past so that her demise was not unexpected. The sympathy of

the townspeople is extended to the family in their bereavement.

And he gave it as his opinion that whoever could make two ears of corn or two blades of grass to grow upon a spot of ground where only one grew before, would do better of mankind and do more essential service to his country than the whole race of politicians put together.—Swift.

Because of the value of feed etc. on and after Nov. 1st, milk will sell at 7 quarts for \$1.00 paid in advance.—E. J. Lacy.

# Why Canada Needs More Money

UP to date the war has cost Canada about \$700,000,000.

Canada has spent in Canada over \$400,000,000 on her own account.

Canada has spent in Canada on behalf of Great Britain over \$300,000,000.

What Canada spends for Great Britain is really loaned to Great Britain and will be repaid or credited to Canada later on.

Great Britain needs so much ready cash to finance her own expenditures at home for herself and for our Allies that she must rely on credit from Canada, and from every other country where she can get credit.

Of course Great Britain's credit is so good that other countries, in order to get her trade, are quite as willing to give her credit as we are in Canada.

Canada wants to help Great Britain not only because Canada wants Britain's trade but because we are Canada and she is Great Britain—both members of the same great Empire, kin of our kin, our motherland.

For Canada it is both a filial and patriotic duty to supply Great Britain's war needs and remember, her needs are our needs. Also it is in Canada's self-interest to supply those needs and thus keep open a market for our products.

Now, Britain needs our wheat, our cheese, cattle, hogs, and many manufactured articles.

Canada also needs many of these things—between the two it amounts to more than a million dollars a day in cash.

And the producers must be paid in cash.

Neither Canada nor Great Britain could go to a Canadian farmer and buy his wheat or his cattle on credit.

The farmer and all other producers might be ever so willing to give their country credit but they could not do it because they have to pay cash for wages,

for raw materials, etc. They must be paid in cash, or its equivalent.

So Canada says to Great Britain—"I will lend you the money so that you can pay cash to Canada's producers for what you want."

"I will borrow this money from our own people just as you borrow money from your people."

"I will also borrow from the people of Canada money to pay cash for all the products that Canada, as well as Great Britain, needs in Canada."

That is Canada's practical, patriotic part in helping to win the war.

Without this credit the Canadian producer could not sell to Great Britain, and without these Canadian products the war would be prolonged.

So it is necessary for Canada to give to Great Britain the credit in order that Canada's own producers, who need a market, will have one; and in order that Great Britain which needs the products to win the war, will get them.

Now how does Canada get the money by which both Canada and Britain can pay cash for Canada's products?

By borrowing it from the people of Canada through the sale of Canada's Victory Bonds to be offered in November.

That is why Canada's Victory Bonds are offered to the people—to raise money to help to finish the war.

"Canada must keep her shoulder to the wheel even though it be a chariot of fire," and the way for Canada to keep her shoulder to the wheel is by buying

# Canada's Victory Bonds

Next week this space will tell why Canada raises money by selling Canada's Victory Bonds

Issued by Canada's Victory Loan Committee in co-operation with the Minister of Finance of the Dominion of Canada.

### Huge Program

Some 750 Ships Valued at \$25,000,000  
For Coast Yards

British Columbia's shipbuilding program provides for the construction of some 117,000 gross tons of commercial shipping, which will have a total carrying capacity of nearly 185,000 tons. The value of these ships some 50 in all, is in the neighborhood of \$25,000,000.

While this estimate of construction of tonnage is only approximate, it includes practically every item of importance in freight-carrying. There are, however, a number of small ships being built on the coast, which have not been included. With these the total gross tonnage would be about 150,000.

All the ships forming a part of the present program of shipbuilding are taken in account. Some of the ships are already in the water, and are nearly begun, but the amount of tonnage being represented definitely contracts away.

### BABY'S OWN TABLETS PRIZED BY MOTHERS

"Mrs. Henry Vanstrader, Rodney, Ont., writes: 'I have used Baby's Own Tablets for the past five years and prize them very much. They are the only medicine I have used for my children. I always keep them in the house.' Once a mother has used Baby's Own Tablets she would not be using else. They are thorough but mild in action and never fail to make the sick baby well. They are sold by all druggists and are a sure remedy for a host from The Dr. Williams' Medicine Co., Brockville, Ont."

### The Real Nerve Problem

The real problem is to sweep the U-boats from the sea. That is purely a military problem, and the American fleet is now joined with the British and French navies for that solution. The allied fleet must strike it for the moral as well as the military effect that such a victory would have. Germany—From the Providence Journal.

### Paper Clothes

#### Paper Clothing With Which Germany Is Threatened

Some interesting further details are now available about the paper clothing with which Germany is threatened. The "Times" made of paper is very rough, and delicate clothes will be able to stand the test for shirts and underwear; but German science will not doubt be able to overcome the difficulty before next spring. Paper is now being used for coats and suits, and its natural color is used for trousers. It is quite good for coats and does not tear in the wash provided that it is not soaked before washing. It is also very useful for linings. It can be had in pure white, which looks like "whiting." (The extra conceal the British origin of the word).

Very strong blue overalls for workmen have also been made of paper, and even striped and spotted blues are available for ladies' skirts. Finally, paper trousers are highly recommended. They are striped, and look very handsome, and moreover, guaranteed waterproof. By the spring whole cloth will be on the market, and also trousers for ladies' clothes, which will be so flexible as to fall into graceful folds and drape all but experts—London Daily Mail.

### The Ferment Of Reconstruction

#### Nothing Else Will Matter if We Fail to Win the War

This ferment of reconstruction is a wonderful thing, and on the whole an admirable thing. But there is one event in which it can be of nothing—so far as this country is concerned. It will come to nothing if the Germans win. We shall have to leave the land, the railways, the means, the money, nor the liberty to carry out schemes into effect. Nothing will be left of the ferment but the gas that has been given and a black void at the bottom of the tank. Meanwhile the ship which will be constructed by the Germans—and in a manner that none of us approve of.

In that event the future history will have some comments to make about all this which will not be of any use to the only conclusion that may live to read this. "These worthy people" they will say, "spend most of their time in talking about this business, and too little on carrying the war to the only conclusion that may live to read this. "These worthy people" they will say, "spend most of their time in talking about this business, and too little on carrying the war to the only conclusion that may live to read this."

When they lose an ironclad in the North Sea, or a position in Flanders, they proceeded forthwith to a conference on reconstruction and discussed a new religion. When the casualties were exceptionally serious they began talking about the land and held a baby week. When they lost a ship, they discussed a league of peace; and so on. These remarks were actually made in the morning of the day, not indeed by a future historian, but by the "Times" young man who returned from the trenches. And he told us that the war there is a intelligent young officers, not to speak of the private, will have a good deal to say in making the history of the war. If we lose the war, they have made our chief contribution to the world by reconstructing society during their absence, will have to look out for themselves.

### Rhubarb in the Cellar

To successfully grow rhubarb in the cellar during the winter months, the plants must be allowed to remain out of doors until the ground has frozen quite solid and remained so for several days. The earth can then be dug out, the roots of the crown, the roots lifted and placed in a barrel half full of good soil, and placed in a cellar where there is no frost. The plants should be kept at a temperature of fifty or more degrees. The plant will soon put forth growth, and the winter supply will be ready. The plants should be kept in a cellar where there is no frost. The plants should be kept in a cellar where there is no frost.

### Consumption of Rice Greatly Increased

Believed That It Has Direct Relation to High Price of Wheat and Flour

The increasingly important part rice is playing in feeding the people of the United States is shown in figures compiled by the United States food administration. The production for 1914-1915 amounted to 1,064,000,000 pounds with a per capita consumption of 11.34 pounds. This was increased in the 1916-1917 crop to 1,438,000,000 pounds, with a per capita consumption of 17.33 pounds.

The large increase in consumption in the past year undoubtedly has direct relation to the high prices of potatoes and wheat.

### Wheat Reserves

India, Argentina and Australia Will Have Large Quantities of Grain to Ship

The exportable reserve of wheat now on hand in Australia is estimated at 1,057,000 bushels, and in Argentina 803,500 bushels, and in Argentina 2,617,000 bushels, according to figures received by the United States food administration. These reserves have been materially increased by the coming winter harvests in these countries.

If these and other wheat stocks are available to meet the needs of the allies, the wheat problem of the United States will be immediately solved. But it is not so simple as always taken into consideration. The wheat shipped from Australia, now being three times the tonnage per car as that from the United States, since the route to be three times as long, and the extra tonnage for this purpose will be three times as great.

The submarine danger is about twice as great as that of the cargo of wheat, however, are now being received from the United States, and the western coast, mostly by killing vessels, transported across the continent, and reaching the coast by railroads to the allied countries.

In the Argentine, wheat will be harvested in December and January. In Argentina in February and March. The coming Argentine crop is usually estimated at 2,250,000 bushels of wheat, as against a production of 1,000,000 bushels for last year's crop. The Argentine wheat for export is being quoted at \$1.25 per bushel.

In the Argentine, wheat for the new crop is in progress, with a heavy acreage of planting reported. No estimate from India is given either, but that the crop is heavy.

### Ashtoria Overcome.

The "Times" has reported that the Ashtoria, Ore., has been completely overcome by the German forces. The German forces have been completely overcome by the Ashtoria, Ore. The German forces have been completely overcome by the Ashtoria, Ore.

### Spoils or Heirlooms?

Advertisements very often provide interesting insights on matters in Germany. The following extract from one appears in a Dutch paper: "Large quantities of old pictures, Dutch, German, Flemish, Italian, and French, have been found. In addition old Gobelin and tapestries and carpets for sale. Above at present time in Germany not for the Dutch frontier."

"The above is what proceeds from the 'spoils' of the war. By forming 'only solvent buyers' to acquire themselves for food or else, some aristocratic burglar from Belgium endeavoring to unload his spoils."

## GILLETTE'S

IT NO EQUAL

It not only softens the water but also removes the impurities of soap, and makes everything sanitary and wholesome.

Good Scouts

A dispatch from Lexington, Mass., says that windfall apples will not be left to rot on the ground in the orchards of that town this year. The Boy Scouts will make daily collections and send the fruit to Boston for distribution among the poor.

This sound economical plan has been worked out from the suggestion of a local official. The fruit growers have agreed to it, and as a result many bushels of good fruit will be saved which would otherwise go to waste.—Providence Journal.

### THE ALCOHOL CANADA NEEDS

Immense Possibilities for Manufacture of Alcohol for Commercial Use

The demand for Dominion prohibition of the manufacture and sale of liquor is growing in volume. Against this the old cry of "damaging business interests" and retarding economic growth" continues to be heard. It is the only recourse of the whiskey manufacturers.

Nevertheless if the liquor were wise, they would prepare for the inevitable change. And in making it they need not lose money either. There is a better way.

Perennial is badly wanted in Canada at all times. The domestic production is decreasing its imports increasing. In 1916 292,000 gallons of good line alcohol were imported, valued at 14,600,000 were imported into the Dominion.

To win Dominion prohibition by home-made industrial alcohol, the industry must be able to produce, cook and use in interest. The State must be a good substitute for petroleum.

Why should the Canadian imports of alcohol? In 1916 Canada imported 18,322,000 gallons of gasoline valued at \$1,000,000. This product is increasing all the time, the available supply is being made increasing. In 1916 292,000 gallons of good line alcohol were imported, valued at 14,600,000 were imported into the Dominion.

To take the possibilities of the potato alcohol. According to the Dominion horticultural, 200 bushels of potatoes can be produced from an acre of good line alcohol. The value of potatoes is increasing all the time, the available supply is being made increasing. In 1916 292,000 gallons of good line alcohol were imported, valued at 14,600,000 were imported into the Dominion.

As the potato is a great opportunity in British Columbia for the production of alcohol. The value of potatoes is increasing all the time, the available supply is being made increasing. In 1916 292,000 gallons of good line alcohol were imported, valued at 14,600,000 were imported into the Dominion.

## BINDLOSS

Now that Mr. Winter has entered sunny Alberta, apparently for an extended visit, I find ample time to turn myself to the Bindloss column, which also has been given such a poor introduction in our Province and surrounding countries and which place is gradually dying away, for even a wee dot on the map given publicity is bound to draw our attention. This has proven to be the case with several landseakers who have bought farms for their prices and will make a success by the square deals given them by the veterans of this country.

We wonder whether we are in Alberta when we see the vast alterations and changes that are being made by our farmers of the Empress and Bindloss district.

We can notice, for instance, a well re-modelled house on Mrs. Falconer's farm. On the Chesney farm a new cowstable and other new buildings are nearing completion. A new cottage home can also be noticed on the Boes farm, and further east we see the fine buildings on the Strom farm looming up against the sky line.

Going south and south-east one finds a well kept and improved country, worth while looking at especially for those who are anxious to settle in this vicinity. Houses and barns have been built all through the country. The population is of a good class and the prosperity of the country has been unchecked. And the soil contains fabulous riches unknown to the big majority of our community.

We'll turn now to Bindloss itself. As the slope of the townsite is towards the town is protected from the severe north winds. It is located close to the Red Deer river, the rapids of which are still apparently useless to this world.

The progress of the town at the present is practically at a standstill, but the time is not far when growth will once more start and reach a size that few will or can imagine.

Remember, Bindloss has the country, and it is there the proof of our statement lies. The reason for the lack of growth to Bindloss is that a bank is withheld from there. There will never be a town where there are no banking facilities, therefore we must exert our influence to the biggest extent possible to secure this necessity.

Another need is a school. There are certainly enough little children now around, old enough to be sent to school, whose mothers are wishing that someone would take the teaching job.

Therefore, settlers of this district, we ask your permission to introduce our weekly views on the district, thinking that it might help us to achieve such progress as will be pleasing to us all.

## Hawaiian Music to Be Feature of Big Chautauqua Program

ONE of the rare treats in store for Chautauqua patrons is a short afternoon program and a full evening concert by the Waikiki Hawaiian Quintet. This group of Hawaiian musicians are finely educated and finished in music. They are performing a variety of songs from the Ainu and Tropic Islands. The group is such enthusiasm throughout the United States for several years. With ukulele and guitar they play the beautiful, soothing and wistful melodies of the islands in a manner that grips the hearts of every one in the audience.

**NOTICE** Reserve your seats now. Seat bookings are being taken rapidly

## Exemption Tribunals.

Exemption Boards have been chosen in such a way as to make them absolutely independent and removed from all influence. There are over 1,250 boards throughout the country, each composed of two men, one appointed by the county judge in the district concerned and one selected by a joint committee of Parliament. Being familiar with local conditions where they sit, the members are well fitted to appreciate such reasons for exemption as are put before them by men called up.

Exemption will be granted to those who can establish that it is in the national interest that they remain in civilian life. This is for the Exemption Board to decide after having received full information in each case.

The grounds on which exemption may be claimed (which are similar to the grounds recognized in Great Britain and the United States) are as follows:—

- (a) That it is expedient in the national interest that the man should, instead of being employed in Military Service, be engaged in other work in which he is habitually engaged.
- (b) That it is expedient in the national interest that the man should, instead of being employed in Military Service, be engaged in other work in which he is habitually engaged and for which he has special qualifications.
- (c) That it is expedient in the national interest that, instead of being employed in Military Service, he should continue to be educated or trained for any work for which he is then being educated and trained.
- (d) That the soldier's hardship would cause if the man were placed on active service, owing to his exceptional financial or business obligations at domestic position.
- (e) Ill health or infirmity.
- (f) That he conscientiously objects to the undertaking of combatant service and is prohibited from doing so by treaty or by law, in effect on the 1st day of July, 1917, or any previous religious denomination meeting and no loyal citizen should assist in, or allow himself to be made a party to, any Claims for Exemption unless thoroughly satisfied that it is made in good faith.
- (g) That he should be exempt because discharged under the War Time Election Act.

No Claim for Exemption should be put forward unless one or other of these grounds in fact exists, and no loyal citizen should assist in, or allow himself to be made a party to, any Claims for Exemption unless thoroughly satisfied that it is made in good faith.

Exemption may be applied for by the man selected themselves or by their parents, near relatives or employers. Application for exemption must be made on printed forms to be found at every post office, which are to be filled in and left with the postmaster if exemption is desired. The postmaster will forward the form to a Registrar, who will send it to the appropriate Exemption Board. In due time, then, the Applicant will get notice as to when he must present his case before the Board.

Issued by The Military Service Council.

### Police Court News

On Friday, Oct. 19, William J. and Mrs. Shouldice, appeared before Justices of the Peace, Quinn and McCaul, at Alaska, charged with the theft of a horse saddle from Adam Keyes, a neighbor. Mr. S. Walker, of Murray & Walker, barristers, Alaska appeared for the prosecutor, and Mr. H. J. Duff, barrister, Empress for defendants. The accused pleaded not guilty and alerted to be tried summarily.

The chief witness for the defence was Mr. R. M. Henderson, J. P., of Empress, who testified that Shouldice had consulted him as to his right to repossess the saddle, and was advised that he would be justified in recovering it, as the stopping payment of the cheque so soon after it had been issued gave reasonable grounds for the belief that Keys had obtained the saddle under false pretences.

The Justices, without rising found Mrs. Shouldice not guilty and intimated that they would adjourn the court to enable them to consider their verdict in the case of Mr. Shouldice. When the court resumed a few minutes later, Justice Quinn announced the verdict of the court as one of no guilt. He said that he and his brother Justice attached the greatest importance to the testimony of Mr. Henderson, and indicated that but for his evidence a Shouldice might have had difficulty in satisfying the court that he was acting in the color of right when he took the saddle. While he thought the saddle had been taken unlawfully, the taking did not, under the circumstances, constitute theft. As to the disposal of the saddle, he would support Mr. Duff and order it to be restored to Shouldice, leaving Keys to his civil remedies. He found neither side liable in costs.

## Boy Scout Notes

Boy Scouts Receive Awards for Saving Life

His Excellency the Duke of Devonshire, as Chief Scout for Canada, has been pleased to award the following medals:

Silver Crosses: Troop Leader Philip A. McMillan; Patrol Leader George J. Govey; Scout Leader E. H. Moulton; Scout John D. Govey, all of Kelowna, B.C.

For rescuing a boy who had broken through the ice on Okanagan lake last week, and because the boy effected with imminent risk to all four boys a rescue, remarkable resource and intelligence.

Patrol Leader Frank B. Johnston of Toronto, who rescued a young boy from drowning in the Scugog river near Lindsay, Ont., Johnston who is only fifteen years of age, brought the young lad ashore from weeds and after a struggle.

Scout Ralph Brownell of Toronto, who assisted in rescuing a man from Lake Muskoka.

In the latter two awards His Excellency the Chief Scout, personally made presentations at the provincial last week at the national exhibition.

Toronto, Ont., March 1917. Gilt Medal of Merit: Scout Andrew Lister, of Kelowna, B.C., who is only fifteen years of age, and who with exceptional coolness and resourcefulness, saved a young man passing buckets of water.

## Waterways Being Scoured For Fish in Stricken Land

Enemy Leaving no Food in Evacuated Region For Use of the Allies

Germany's latest effort at sucking dry every inch of the invaded region of France before she is obliged to evacuate them has just come to light in the discovery that the canals and rivers of northern France are being scoured for fish.

The necessity was only made plain by the French recently undertaking the task of rendering these waterways navigable, after the German destruction of bridges, locks, embankments and barges.

The necessity of draining dry many of the canals and portions of rivers had rendered unusable by the Germans has brought to light the numerous fish traps, seines, barriers and other appliances used by the Germans in order to catch absolutely every fish.

It is probable that the canals and rivers are being scoured into sections with barriers across each end and the fish are being taken as a single fish. Evidence has also been found of the use of explosives for stunning the fish and bringing them to the surface where they were released in withered land.

Previous to the German invasion the canals and rivers of northern France had been brought to a high state of productivity by the enforcement of practical laws regarding the fish industry.

The idea of draining the canals and rivers was to keep the productivity of these waterways at all times. River fishing constituted the most important industry of the country, and a careful observation of the fishing laws insured the productivity of the rivers.

The one idea dominating the German apparatus to render the canals and rivers barren was to keep them from being productive.

The Germans in order to catch absolutely every fish, frequently used explosives for stunning the fish and bringing them to the surface where they were released in withered land.

250

Seems a very large number of cups to get from a pound of tea. But that proves the fine quality of Red Rose Tea, which goes further and tastes better because it consists chiefly of rich, strong tea grown in the famous district of Assam in Northern India.

A pound of Red Rose gives 250 cups.

Kept Good by the Sealed Package

Prepared only by Thomas Keef, St. Helens, Lancashire, England.  
Sold everywhere in Canada and U.S.A. Price, 25 cents.

## NERVOUS TROUBLE

The nerve system is the governing system of the whole body, controlling the heart, lungs, digestion, and brain; so it is not surprising that nervous trouble is one of the most common ailments.

The first stages of nervous debility are noted in irritability, loss of restfulness, and in the victim seems to be oppressed by a sense of weariness.

Immediate attention, for nothing but complete rest and a change of environment will prevent complete breakdown.

The victim, however, need not despair for even severe nervous disorders may be cured by improving the condition of the system.

You can get Dr. Williams' Pink Pills actually make new, rich blood, and thus cure the most extreme nervous disorders after a few weeks.

## Britain Has Found Herself

By Willing to Live in the Saturday Evening Post

The British Empire has arrived, after two years of a magnificent struggle against unpreparedness, the tendency toward middle and hard circumstances it is reaching its pinnacle of efficiency.

Such is the general impression one brings back now from the war, that the British Empire has arrived, after two years of a magnificent struggle against unpreparedness, the tendency toward middle and hard circumstances it is reaching its pinnacle of efficiency.

## German People to Blame

German people as a whole are responsible for the war.

Because we have realized the character of the German people, dominated as they have been in the last quarter of a century or more, we cannot avoid the conclusion that they are responsible for the war.

**Imperial Elevator & Lumber Co., Ltd.**

C. W. HAYES, Agent

## A Monthly Income For Your Widow

A new privilege applicable to all Imperial Life policies permits the assured to specify that the proceeds of his insurance shall, on maturity be payable in monthly, quarterly, half-yearly or yearly instalments for 10 years certain, and so long thereafter as the beneficiary named shall live.

While in the calculation of the instalments a definite rate of interest is guaranteed, such payments in the case of participating policies will be increased by sharing in the interest which the Company earns in excess of this guaranteed rate.

Therefore, by means of an Imperial policy you can provide a definite, dependable, regular income to care for your widow as long as she lives, and for your children until all of them are at least old enough to be self-supporting.

But this is only one of the many advantages of this valuable new privilege. Many others are explained in our booklet "Safeguard Your Legacy." Write for a copy to-day. It's very interesting, and—its free.

## Local and Personal

Remember the knitting circle at Mrs. Brodie's home to-night (Thursday) evening.

Samuel Clashman, of Alderson is the new junior clerk at the local branch of the Union Bank.

Don't forget the regular weekly meeting I.O.D.E. in the theatre.

Ira McLean is now located at Cairn, where he is second in charge of the Revelstoke Sawmill Co. His family expect to follow shortly.

A large number of local men are completing their registration sheets in preparation for the conscription call which will be issued for the first class of men on the 10th of November.

Avoid the rush and secure your seats for the Chautauque. The dates are November 2, 3, and 5. A season ticket ensures you a reserve seat and saves you money.

Hayden Finkle and family have taken the house formerly occupied by Dr. H. W. Kourko, and will reside there for the winter. Mr. Finkle has disposed of his farmstead north-west of town.

The item printed elsewhere in this issue that the Leland Church will hold a social Friday, Nov. 2nd, is incorrect, as we have just received notice that the same has been postponed indefinitely.

The I.O.D.E. wish to thank Mr. Tyler for his generous donation of twenty-three dollars and seventy-five cents (\$23.75), this amount being the full proceeds from the show Wednesday night, 17th inst. Also to thank Mrs. Young for a donation of \$2.00.

Arthur and Miss Edith Collins, of Bridgeford, Sask., are visitors in Empress this week.

Messrs. Robt. Hamilton, Geo. Avey and Gordon Smith made a trip to Medicine Hat on Wednesday of this week, for the purpose of taking the medical examination in connection with the Military Service Act.

We have been shown by Con Valk a letter from the Secretary of the Great War Veterans' Association, acknowledging the receipt of \$104 through him towards the funds of the Association. This sum was realised from the proceeds of a dance held in the theatre on Thanksgiving day, October 8th.

Announcement is made in the Sentinel-Review of Woodstock, Ont., of the death of Lieut. A. Drury Brink, who was killed in action on September 20. He enlisted in Edmonton. When overseas he took a course of military training at Balliol College, Oxford, and was afterwards given a commission in the Lancashire Fusiliers. He went to the front in August last. His parents reside in Edmonton. He was closely related to Mr. and Mrs. A. E. Galloway of our town.

Local executive committees for the Victory war loan are now being appointed all over Canada. The loan will be conducted on the same system as the Great American Liberty Loan. Mr. McAtter, of Calgary, was in town on Wednesday and addressed the local Board of Trade on this subject. A local executive committee was formed of which R. M. Henderson is treasurer and M. A. Blodgett, secretary.
